

Dear Canonical Hiring Team,

Canonical's mission to accelerate open-source adoption across the global enterprise market is not just a technical goal; it is a masterclass in global coordination and vision. My current role as an **International Project Manager & Coordinator at Bahçeşehir College** and my operational experience within the **French National Education System (Eplefpa De Rethel)** have prepared me to thrive in Canonical's high-standard, globally distributed environment.

As a project manager, I excel at translating complex technical challenges into actionable business strategies. My profile aligns with Canonical's core needs in the following ways:

- **Global Remote Operations & Stakeholder Engagement:** I have managed end-to-end project lifecycles for global initiatives, facilitating collaboration between internal teams and international stakeholders. My experience orchestrating partnerships with 15+ international organizations across 6 countries demonstrates my readiness for Canonical's cross-cultural, remote workflow.
- **STEM Foundation & Technical Literacy:** With a Bachelor of Education in English Language Teaching and a focus on AI-based STEM projects under the Erasmus+ framework, I possess the "STEM discipline" mindset required for managing complex software technologies. My proficiency in SQL and experience with Learning Management Systems (LMS) ensure I can engage respectfully and intelligently with engineering teams.
- **Agile Methodology & Project Governance:** I hold certifications in **Agile Project Management from Google** and **SQL Expertise/Project Management from BTK Academy**. I am adept at using tools such as Jira, Asana, Trello, and SAP S/4HANA to ensure projects are delivered within scope and schedule.
- **Crisis Management & Resilience:** During my time at **Istanbul Airport (IGA)**, a high-volume international hub, I resolved critical operational bottlenecks and real-time crises under strict time constraints. This level of accountability is what I bring to Canonical's enterprise clients.

Canonical's culture of excellence and its status as a pioneer of global distributed collaboration is exactly where I want to "raise my game." I am eager to apply my adaptability, technical background, and passion for open-source to drive project success for your global clients.

I look forward to the opportunity to discuss how my international project management background can contribute to Canonical's continued growth.

Thank you for your time and consideration.

Sincerely,

Batuhan OĞUZ batuoguz031@gmail.com
